## Seeking Internship in Machine Learning

### EDUCATION

#### Savitribai Phule Pune University | 2022 – 2026

B.Tech. in Computer Engineering at JSPM

- GPA: 7.7

Class 12– P Jog Jr College, Pune

- 53.17%

Class 10 – Millennium National School, Pune

- 89.4%

### TECHNICAL SKILLS

Programming Languages

- Python (Core), SQL, JavaScript

Frameworks and Libraries

- Tensorflow / Keras, Scikit-learn, Transformers, Pandas, Seaborn, Django

### COURSES & CERTIFICATIONS

- Python Developer – KIMO
- Advanced Data Structures and Algorithms – KIMO
- Kaggle Micro-Course: Intro to ML
- Microsoft Learn – Generative AI for Beginners

### RESEARCH PAPER

#### Investigating Bias Amplification Mechanisms in Large Language Models.

Researched on social, gender, and cultural bias propagation in transformer-based architectures using benchmark NLP datasets, and analyzed the effectiveness of existing bias mitigation methods such as data rebalancing, counterfactual augmentation, and debiased fine tuning on overall model fairness and accuracy.

### OTHER

Extra-curricular

- Conducted 9<sup>th</sup> and 10<sup>th</sup> grade math classes as an Assistant Teacher at Deshpande Academy, Pune.
- Volunteered as a youth football coach, training children in game fundamentals.

### EXPERIENCE

#### Trainee Software Developer | Aug 2025 – Oct 2025

IndRed Technologies

- Participated in project meetings between developers and clients.
- Developed and tested backend and analytical modules in multiple projects under guidance.
- Collaborated on client-driven feature implementation and debugging.

#### Software Developer Intern | Jan 2025 – Apr 2025

Austere Systems Limited

- Developed a transformer-based sentiment analysis pipeline for the Haryana Government using Twitter datasets.
- Performed data preprocessing with Pandas, implemented NLP models, and generated structured outputs with Matplotlib for visual insights.

#### Software Developer Intern | Jun 2024 – Jul 2024

P-Webcraft Technology

- Completed a two month training program focused on software development fundamentals.
- Learned about AI integration in real-world systems

### PROJECTS

#### Learnify Market | Final Year Project

- Built a marketplace connecting educators and learners through a web platform using full-stack technologies.
- Implemented user authentication, content management, payment gateway and a responsive UI for a smooth learning experience.

#### Portfolio Website

Built a personal portfolio website with Python backend to showcase projects and research work and improve coding skills.

#### Moodify | Ongoing Personal Project

- Building an emotion recognition system that predicts user mood from audio signals and facial expressions using Deep Learning concepts.
- Leveraging TensorFlow for feature extraction and model training.
